

Occupational Health Services

Technology That Helps Streamline Medical Testing

Our technology reduces administrative burdens and requirements on organizations and transportation departments for medical services such as:

- ✓ Drug Testing
- ✓ School Health Certificates
- ✓ Physical Exams
- ✓ TB/PPDs
- ✓ DOT Physical Exams
- ✓ Fit for Duty Testing

Easily track the status of an applicant and where they are in the medical testing process. Organizations using our technology will know when the applicant has initiated the process, received their paperwork, scheduled an appointment, and completed testing through our online monitoring system.

Streamlined Process for Organization & Applicant

Provide Applicant with Multiple Clinic Options

Reduces Administrative Burden & Oversight

Schools, Transportation, and Safety Departments can easily track when any medical service with an expiration date is about to expire. Notice of expiration can be sent 90/60/30 days to the donor and organization notifying them of the expiration.

By offering this technology to applicants, not only will the system walk the donor through the entire process, it also provides negotiated pricing up front and avoids walk-in rates at many of the providers.

Applicant Friendly Technology - Makes Scheduling Easy

Our technology provides applicants the ability to choose a clinic based on their own personal physician, or they can select a cost effective clinic that can match up for your organization.
